A&D WEIGHING

# Realizing Compact, Incre

We have developed a Miniaturized SHS (Super Hybrid Sensor) to which is 40% lighter and 47% smaller than our GF series with a while maintaining A&D's superior weighing functions.

## B5 size footprint

Ideal for installation and use in narrow spaces

## Compact SHS (Super Hybrid Sensor) – 1 second stabilization

Quick stabilization speed with accurate weighing for better productivity

## VFD – Vacuum Fluorescent Display

Large VFD for easy-to-read weighing results

## SCF – Statistical Calculation Function

Can display and/or output statistical calculation data as No. (number of data), SUM (total), MAX (maximum), MIN (minimum), R [range (maximum – minimum)], AVE (average), SD (standard deviation) and CV (coefficient of variation)

## Quick USB interface (FXi-02)

Easy-to-use optional USB interface, with no driver installation necessary, for transfer of weighing data to a computer (applicable OS – Windows 98 OSR2 or later)

## Standard RS-232C interface

Incorporates bi-directional communication with a PC, printer or other peripheral devices

## GLP/GMP/GCP/ISO Compliant

In accordance with GLP and LIMS regulations, the balance ID number and calibration data can be printed out using A&D's AD-8121B or a PC

## Comparator function

Easy to compare weighing results by setting HI limit and LO limit to display HI,OK,LO indicator

## Buzzer function

A beeping sound to indicate HI, LO or OK can be selected for use with the comparator function

## Digital calibration function

Simple and easy to calibrate the balance with external calibration mass and possible to adjust the mass accuracy by  $\pm 50$  digits

## Built-in rechargeable battery (FXi-09)

An optional Ni-MH rechargeable battery pack can be fitted into the FX-i series for use without AC power and for mobile applications (10 hours charging time for 8 hours operation)

## Multiple weighing units of measurement

Programmable or standard weighing units of measurement can be selected; g, pcs, %, oz, lb, L oz, ozt, ct, mom, dwt, GN, tl, tol, mes and MLT

## Response Indicator function

Selectable FAST, MID or SLOW response to suit weighing environment conditions

## LAN – Ethernet interface (FXi-08) with WinCT-Plus software

WinCT-Plus software makes it possible for the user to easily set up an IP address, subnet mask etc. The user can also send commands for control and acquisition of data from multiple FX-i balances

WinCT-Plus

Provided by end-user

Ethernet Hub

Note : Ethernet Hub and cables must be provided by end-users

# Increasing Functions!

To achieve a compact precision balance,  
25% smaller footprint,

# FX-i

### Animal weighing function

The HOLD function enables freezing of weighing data for animal weighing applications and an ANIMAL indicator appears on the display

### ACAI – Automatic Counting Accuracy Improvement

This counting function recalculates the average unit weight each time a sample is added to eliminate errors cause by variations in unit weight

### Percent mode function

A sample can be registered as 100% and the weight of another sample can be compared as a percentage

### Underhook

The underhook, for hanging applications, allows for measurement of magnetic materials and density measurements in air and water

### Auto Power ON function

The weighing mode display activates automatically with AC power so there is no need to press the ON/OFF key

### Auto Power OFF function

The display switches OFF automatically when the balance is inactive for 10 minutes as a power-saving tool

### Capacity indicator function

Weight on the pan displayed as a percentage of full capacity

### Breeze breaks

Small and large breeze breaks are available to protect against wind for more accurate weighing. The small breeze break comes as standard with the FX-120i, FX-200i and FX-300i which are all 0.001g weighing resolution models

### EMC – Electromagnetic Compatibility

The FX-i meets EMC regulations and is immune to the effects of electromagnetic fields of up to 10V/m
